HTML5, CSS3, JavaScript, jQuery, Bootstrap, Node, MySQL, MongoDB, Express, Handlebars, React, GitHub, Git, RESTful APIs, Mocha, JSON, Sqlite3, Morgan, Heroku, Asynchronous programming, Test-driven development

PROJECTS

cribSmack - cribsmack.herokuapp.com / github.com/Rzavala414/Project3

cribSmack is a companion app for the timeless game of cribbage. cribSmack's goal is to help bring in a new audience of users together to play either competitively or for fun. Track live games and stats in real-time with no need for a board! cribSmack a new twist on an old favorite.

Technology used: Node.JS, Express, React.JS, MongoDB, Mongoose, Bcrypt, Express, Express-Sessions, Axios, Material-UI, CSS

StoryBooks- story-builder-2020.herokuapp.com | github.com/Rzavala414/StoryBooks

Create a private collection of personal stories or shar publicly for others to read. Just sign up with your google account and you'll be good to go. Happy story building!

Technology used: Node, Express, Express-handlebars, Express-session Passport-google-oauth, Dotenv, Mongoose, Connect-mongo, Method-override, Material-UI

Explor - rmjones112.github.io/Project1 / github.com/rmjones112/Project1

Explor was created with one goal in mind, to reduce the stress of travelers when preparing for a big trip. With Explor you can relax just a bit more and let us do some of the heavy lifting. Simply input your destination along with travel dates, and once we receive your information, we compile a list of top restaurants, popular attractions, weather, and a tailored checklist for your vacation. In the future, we plan on expanding our application by adding the ability to choose flights and housing.

Technology used: HTML, CSS, jQuery, Ajax, Particle.js, Bootstrap, Yelp API, Weather API, Eventbrite API
