## PROJECTS

***cribSmack*** - cribsmack.herokuapp.com/ | github.com/Rzavala414/Project3
CribSmack is a companion app for the timeless game of cribbage. We fill the need of bringing users together to play competitively or for fun. Track live games and stats in real time with no need for a board! CribSmack a new twist on an old favorite.
**Technology used:** Node.js, Express, React.js, MongoDB, Mongoose, Bcrypt, Express, Express-Sessions, Axios, Material-UI, CSS

***GoGang***- go-gang.herokuapp.com/ | github.com/ronak0624/Project-2
GoGang was created with the intent of bringing individuals together that enjoy going to events at the very last minute. Simply login to your account and see an active feed of live events to join or post your own for others to join in. Once you find a group of three or more you are entered into your own private chat and can organize meeting zones or any specifics the group would like to add
**Technology used:** Node.js, Express, MySQL, Sequelize, Bcrypt, HTML, CSS, Bootstrap, jQuery, Handlebars

***Explor*** - rmjones112.github.io/Project1/ | github.com/rmjones112/Project1
Explor was created with one goal in mind, to reduce the stress of travelers when preparing for a big trip. With Explor you can relax just a bit more and let us do some of the heavy lifting. Simply input your destination along with travel dates, and once we receive your information we compile a list of top restaurants, popular attractions, weather, and a tailored check list for your vacation. In the future we plan on expanding our application by adding the ability to choose flights and housing.
**Technology used:** Html, CSS, jQuery, Ajax, Particle.js, Bootstrap, Yelp API, Weather API, Eventbright API
